

Coil, archangels of chaos, have had various releases issued since the interview. 1000 copies of Coil's themes to Derek Jarman's film 'Blue' were issued on blue vinyl. while 'Is Suicide A Solution' and 'Who'll Fall' from 'Stolen and Contaminated Songs' was released by Clawfist. Both singles are deleted. (If anyone's got a spare copy of the Clawfist single, we'll be happy to take it off your hands) In order to beat the bootleggers '**Stolen and Contaminated Songs**' was reissued with new cover artwork and a track listing. Recently issued was Coil's soundtrack to Derek Jarman's '**Angelic Conversation**', including Shakespeare's sonnets, as read by Dame Judi Dench. Belgian label Sub Rosa's compilation '**Chaos In Expansion**' featured an exclusive Coil track entitled '**Babyfood**'. Upcoming releases include a **Coil/Black Light District** ambient album. On this release Peter and John are joined by long time friend Drew McDowell. Described as 'major trip music' more in the vein of the early German electronic bands. Expected release date is early summer through World Serpent. Should be good. '**International Dark Skies**' is still happening. On this release Coil are helped by Tim Simenon (Bomb the Bass), Diamanda Galas and various other people. This will be 'mind bending' electronic (not ambient) 'strange music even by Coil standards'. Since Boudisque have collapsed, this'll be released as and when.

Trent Reznor, long time admirer of Coil, has signed Coil to his label Nothing. As a result 'Scatology', 'Horse Rotorvator' will be reissued in the USA, allowing Americans to gain these early Coil releases unavailable since the demise of Wax Trax. Also in the works for Nothing is a studio album entitled '**Backwards**'. This should be a more vocal recording, more violent and aggressive but nothing like 'rock music'. Still on the **NIN** front, Coil have followed the remix of NIN's 'Gave Up' from 'Fixed', with several remixes from 'The Downward Spiral'. These have included 'Closer' (already issued), 'Eraser' and the title track.

Coil's collaboration with **Nurse With Wound** is still in the offing. Recording may take place later in the year - Don't hold your breath. The same goes for the joint album John Balance is recording with **David Tibet** entitled '**Haunted Air**'.

Underground comic which was to feature a soundtrack by Coil didn't happen. The comic was published, but not what was expected, with no Coil contribution, whatsoever. However, Coil did provide some of the 'toytown music' to **Current 93's** '**The Nodding Folk in the Nodding God Unveiled**' mini CD and comic. Plans are still afoot to publish a fanzine, booklet on the Black Sun symbol. Contributions in the form of written articles, archive references in books, paintings etc. are still required - not just drawings!!! By the time you read this a single of '**Nasser Arab**' will be issued, via World Serpent. Everything else will come when it comes... Coil can be contacted at **BM CODEX, London. WC1N 3XX, U.K.**

Death In June quickly followed the classic '**But, What Ends When the Symbols Shatter?**' with the 6 track CD/12 of '**Paradise Rising**'. This included the 2 tracks co-written and sung by David Tibet with various mixes in French, English and instrumental versions. After the spate of inferior live bootlegs, NER issued the double LP/CD entitled '**Something Is Coming**'. Recorded live in Zagreb, Croatia with Simon Norris collaborating, this performance was coupled with studio recordings done for Croatian National Radio. More live material, this time from Paris, surfaced on the picture disc 12'/CD of the '**Cathedral of Tears**'. Also included were two versions of the title track featuring an acoustic guitar and church organ as a backdrop to Douglas P.'s crooning. Released from the vaults onto CD was '**Burial**' comprising of a live Death In June performance, with rare and alternate versions of early Death In June material. Also issued on CD was the '**'93 Dead Sunwheels**' compilation including remixes, recordings of songs from the 'nada' period together with the two contributions to the rare NER compilation 'From Torture to Conscience'.

NER plans for an Anton LaVey LP appear to have been dropped, for various reasons. Close collaborator **Boyd Rice** followed the 'Ragnarok Rune' release with a collection of pop songs recorded with Rose McDowall and Robert Lee as **Spell**. '**Seasons In the Sun**' is available on CD only from Mute Records, and it is excellent too. Boyd also recorded a single with Adam Parfrey on Sympathy for the Record Industry as **The Tards**. (if any one's got a spare copy get in touch at the Compulsion address) More recently Boyd issued a single with Lisa Suckdog's mother (no shit) on Sub Pop. Still in America, Storm Productions have issued a number of quality DJ t-shirts. Send an SAE/IRC for their catalogue including their own Blood Axis releases and publications. Contact: **Storm Productions, PO Box 18009, Denver, CO 80218, USA.**

Cthulhu have released the '**Im Blutfeurer**' compilation CD including an exclusive Death In June track. The most recent Death In June material is the '**Sun Dogs**' limited 7" and CD single. The title track 'Rose Clouds of Holocaust' also features Simon Norris with backing vocals by Rose McDowall. Douglas P. is currently in Australia, where he may be working in the studio with Boyd Rice. Expect new material to be aired soon. Further info is available from **BM June, London, WC1N 3XX, U.K.**
